organises

A Three Day International Workshop on “New Research Frontiers”

20 - 22 November, 2017

Research is considered a major parameter for the quality in higher education. High quality publication is an indicator of good research which is of today's major concern. In order to address the issues related to quality publication, challenges in bringing a rigour in the research, and to complete the task undertaken by the researchers, a three day International workshop on “New Research Frontiers” is organised for the recognised research supervisors, research scholars and post graduate students. Resource Persons of international repute are invited to deliver talks on various aspects of research.

Intensive interactions and brain storming sessions with the resource persons are planned. The last day is meant for presentations of progress report by the research scholars and feedback sessions.
