**Details**

Vedas are the eternal life base of the human civilisation for many millenia. Indian Scholars starting from Yaska have tried to understand the true meaning of Vedas. Western scholars too have been trying their hand in understanding them for last two centuries. However both Indian and western scholars have not been able to understand and expound the real nature of Vedas due to varying reasons of brevity, terncess of language, ignorance of cultural context, lack of proper methodology etc. Sri Madhvacharya has written a Bhashya on first forty suktas giving a clear exposition of troika of Vishnu, Devata and Adhyatma meanings.

However there have been no efforts to tread the path of Madhvacharya for the last seven centuries. Vishnvarchana Vedabhashya Project, to create a new commentary on Rgveda on basis of Vedic and allied texts context and modern scholarship in the light of path shown by Madhvacharya.
